The key to greater independence: Eurokey

Eurokey

What is the Eurokey?

In Switzerland and parts of Europe, the Eurokey gives you access to passenger and wheelchair lifts, barrier-free changing rooms and toilets, and other facilities for people with disabilities. The Eurokey is a pass key that improves accessibility and allows you to be more independent every day. The great majority of Eurokey facilities are also available outside regular business hours, and key-only access means they are well protected against misuse and vandalism.

How do I find Eurokey facilities?

There are currently more than 3,400 Eurokey facilities in operation in Switzerland.

You can find Eurokey locations by using the free Eurokey app for iPhone and Android. An up-to-date directory of facilities is also available on eurokey.ch. All facilities are marked with the Eurokey sticker.

Who can get the Eurokey?

You can order the Eurokey if your mobility is severely restricted, if you have a visual impairment or chronic bowel or bladder condition, or if you wear a colostomy bag.

How do I order the Eurokey?

You can contact an authorised outlet in person, or use the order form (eurokey.ch/order).

What does the Eurokey cost?

You can purchase the key for a one-off fee of CHF 45.00 (incl. VAT, plus CHF 5.00 postage in Switzerland).

Report new facilities

Please report new facilities via the app, at eurokey.ch/anlage-melden, or by calling the Hotline at 0848 0848 00. You will be helping us to keep the directory up to date.

Eurokey facilities

Advice on building a Eurokey facility

Our Barrier-Free Construction offices provide support with planning an accessible facility with a Eurokey security system. With the help of our staff, you can be sure that you meet the requirements of SIA norm 500 for barrier-free buildings. Visit eurokey.ch for the addresses of these offices and further information on constructing Eurokey facilities.

Where do I order a Eurokey cylinder?

Planning to fit your building or facilities with a Eurokey security system?
